

Harmful Effects of Taking Drugs Chart– CT018

<p>Description</p>	<p>◆ This chart in the Health Series colourfully illustrates the areas of the body that are affected by taking drugs. It provides facts about the "class" of each drug and what kind of drug it is and the effects it has on the body. Drugs can kill - it is as simple as that. They destroy the body's essential organs of life. They destroy your family and social life. They drive you to criminal behavior. They destroy your self-esteem and self-respect. So don't destroy your life taking drugs - BE SMART - DON'T START - It's as simple as that!! This is an important chart for schools, colleges of education, universities, health centres and drug clinics.</p>
<p>Details</p>	<p>1. Dimension: A2 Size</p>
<p>Image</p>	 <p>The chart features a central illustration of a human body with various organs and systems highlighted in different colors. Surrounding the body are callouts to specific areas: Brain, Heart, Lungs, Liver, Kidneys, Veins, and Arteries. A central callout points to the 'AREA OF ANAESTHETIC ORGANS'. The chart is titled 'EDUCATIONAL INFORMATION ON THE HARMFUL EFFECTS OF TAKING DRUGS' and includes a warning at the bottom: 'DON'T DESTROY YOUR LIFE - DON'T START! TRY SPORT, MUSIC, ART, DANCE, ETC - BUT NOT DRUGS'.</p>
