

Functional Anatomy of Circulatory System Chart– CT078

Description	<ul style="list-style-type: none"> ◆ This chart provides sound and clearly illustrated information about how the blood circulates round the body, description and illustration of the lungs and how air is inhaled into the body. Information is also given about blood flow through the heart as well as an explanation about the electrical conduction system which regulates the heartbeat. ◆ As one of three charts in the Cardio-respiratory set this chart is an excellent reference aid for students who are studying to become nurses, paramedics, personal trainers and those doing AS and A level biology and sports studies. The content is well laid out to make it easy to understand.
Details	1. Dimension: A1 Size
