

Sectional Anatomy and Function of Circulatory System Chart– CT079

<p>Description</p>	<ul style="list-style-type: none"> ◆ This is a full colour laminated chart and illustrates how blood flows throughout the body to and from the heart. It shows the main arteries and veins of the head and neck as well as those supplying the shoulder and thigh and explains how the blood flows to and from these areas of the body. The Hepatic Portal System is also illustrated showing the hepatic portal vein and explaining how the system collects blood from the whole of the bowl in the abdomen. The hepatic portal system consists of the Liver, Stomach, Spleen, Small Intestine, Ascending and Descending Colon and Rectum. ◆ This is an extremely useful chart for any student studying the circulatory system as well as hospital teaching departments for nurses doing incentre training. It is colourful and easy to understand. Two views of the heart illustrate and name the arteries and veins that supply blood to and from the heart. It is one of three charts in the Cardio-respiratory system set and therefore it is essential to purchase the set.
<p>Details</p>	<p>1. Dimension: A1 Size</p>
<p>Image</p>	 <p>The chart, titled "SECTIONAL ANATOMY and FUNCTION OF THE CIRCULATORY SYSTEM", features a central illustration of a human figure with the circulatory system highlighted in red (oxygenated) and blue (deoxygenated). Surrounding this central figure are several detailed diagrams and text blocks:</p> <ul style="list-style-type: none"> MAIN ARTERIES OF HEAD AND NECK: Shows the carotid and vertebral arteries. ARTERIES AT THE BASE OF THE BRAIN: Illustrates the circle of Willis. MAIN VEINS OF HEAD AND NECK: Shows the jugular and vertebral veins. BLOOD SUPPLY TO SHOULDER: Details the subclavian and axillary vessels. BLOOD SUPPLY TO THIGH: Shows the femoral and iliac vessels. ANTERIOR VIEW OF HEART: Labels the right and left ventricles and atria, and the major vessels. POSTERIOR VIEW OF HEART: Shows the heart from the back, highlighting the pulmonary and aortic trunks. HEPATIC PORTAL SYSTEM: Illustrates the collection of blood from the digestive tract into the liver.
