

Spinal Nerves Chart – DG034

<p>Description</p>	<p>◆ These sturdy, yet flexible anatomical charts are manufactured with 125 micron lamination on both sides. Encompassing a wide range of physical structures and health topics, they combine colorfully detailed diagrams with informative text. Metal eyelets in the top corners allow for easy hanging.</p>
<p>Details</p>	<ol style="list-style-type: none"> 1. Dimension: 20" x 26" 2. Material: gloss paper laminated with clear polyester both sides
<p>Image</p>	 <p>The image displays a comprehensive anatomical chart of the human body, specifically focusing on the skeletal and muscular systems. It features two large, full-body illustrations: one from the front and one from the back. The muscles are color-coded in various shades (red, yellow, green, blue, purple) to distinguish different groups. The skeletal structure is shown in a light tan color. Below the main figures, there are several smaller diagrams: a detailed view of the spine showing the vertebrae and intervertebral discs; two smaller human figures showing the spine and spinal nerves; and a detailed view of a single vertebra. The chart is surrounded by numerous small text labels and lines pointing to specific anatomical features. At the bottom, there are some small text blocks and a logo.</p>
