

Anatomy of the Heart Chart – DG036

Description	<p>◆ New anatomical posters designed specifically for conveying key basic anatomy. Each poster has been created with a detailed, yet simplistic illustrative style then combined with just the right amount of labels and descriptive text. Accurately written and designed for learning the basics in anatomy. Perfect for the classroom, doctors office or where learning and understanding human anatomy is important.</p>
Details	<ol style="list-style-type: none"> 1. Dimension: 18" x 23" 2. Material: gloss paper laminated with clear polyester both sides
Image	<p>Anatomy of the HEART</p> <p>Heart Key</p> <ol style="list-style-type: none"> Superior vena cava Ascending aorta Pulmonary trunk Left pulmonary artery Left pulmonary vein Right pulmonary artery Right pulmonary vein Right atrium Pulmonary valve Aortic valve Left atrium Right ventricle Interventricular septum Left ventricle Mitral valve Papillary muscle Chordae tendineae Anterior vena cava Descending aorta <p>Anterior View</p> <p>Superior View of Heart</p> <p>Posterior View</p> <p>Summary of the Heart</p> <p>The heart is a muscular pump that circulates blood throughout the body. It is located in the chest, between the lungs, and is about the size of a fist. The heart is made up of four chambers: the right atrium, right ventricle, left atrium, and left ventricle. The right side of the heart pumps blood to the lungs, and the left side pumps blood to the rest of the body. The heart is surrounded by a double-walled sac called the pericardium, which contains a fluid that lubricates the heart's movement.</p> <p>What the Heart Takes In</p> <p>The heart takes in blood from the body and the lungs. The right atrium receives blood from the body, and the right ventricle pumps it to the lungs. The left atrium receives blood from the lungs, and the left ventricle pumps it to the rest of the body. The heart is a muscular pump that circulates blood throughout the body. It is located in the chest, between the lungs, and is about the size of a fist. The heart is made up of four chambers: the right atrium, right ventricle, left atrium, and left ventricle. The right side of the heart pumps blood to the lungs, and the left side pumps blood to the rest of the body. The heart is surrounded by a double-walled sac called the pericardium, which contains a fluid that lubricates the heart's movement.</p> <p>Blood Supply to the Heart</p> <p>The heart is a muscular pump that circulates blood throughout the body. It is located in the chest, between the lungs, and is about the size of a fist. The heart is made up of four chambers: the right atrium, right ventricle, left atrium, and left ventricle.
